W.I. Hears Paper On Immigration

The November meeting of the Champion Women's Institute met at the home of Mrs. P. O. Sommers and had a fine time. After the usual opening exercises, the roll was answered by the members giving ideas on immigration problems, a strong feeling against the formation of foreign colonies in this country, and also against the importation of outsiders who are likely to get the comparatively few jobs our own boys are looking for, was evidenced in the responses. There was a good deal of encouraging business reported by conveners of different committees. It was decided to hire the Community hall to entertain our husbands on some night next month, December 11 was tentatively named, a refreshment committee chosen and it was arranged that each member should make and take a Christmas present to give to one of the gentlemen, as we drew the names and every member got some one else's husband to provide for the men are bound to get some classy gifts.

Mrs. Guy Dow gave a most excellent paper on Immigration and we got two new members and \$8.30 collection and a grand lunch provided by Mrs. Manhard and Mrs. D. Harper.

Mrs. Wise invited the institute to meet at her town home for the December meeting, when the election of officers will take place.

Don't Miss

The L.A. Bazaar

A cordial invitation is extended to all the people of the community to attend the bazaar in the new community hall at Champion in the afternoon and evening of Nov. 16th, 1929. There will be a sale of very attractive work including pieces of cutwork, embroidery in colors, applique, fancy aprons, bedspreads and a very warm soft patchwork quilt. Also there will be a very appetizing home produce table, a tantalizing candy booth, a fish pond to delight the young and those not so young a parcel post sale to what the curiosity of all.

Also tea is to be served during the afternoon. A chicken supper a little later and to make a fitting conclusion to a splendid day there is to be a very fine picture upstairs in the auditorium at night. The bazaar will be formally opened at 2:30 sharp by the Rev. S. R. Hunt. Come early so you may make a good choice of the articles for sale.

Elks, Notice!

The next regular meeting of Champion Lodge B. P. O. Elks No. 182 will be held in the Community hall on next Tuesday evening Nov. 19, at 8:30 p.m. Important business and balloting. You are requested to attend.

V. S. Jopling, Secretary

Will Drive For Church Funds

The finance committee or committee of stewards of the United church have decided to complete their canvas for church funds during the week of Nov. 18 and 23rd. The friends of the United church know well that no levy is imposed upon them they demand the church and what it stands for in the community and are prepared to meet our canvassers with a voluntary contribution. One thousand dollars is required by the end of November and four hundred more by the end of the calendar year, to meet immediate obligations.

The committee go to the people in full confidence and are planning to close the campaign with a social evening on Friday the 22nd, to show their appreciation of the response of the community. Everyone is invited and a happy time is anticipated. The finance committee is G. F. Smith, J. S. Collins, R. I. Baker, H. H. Poirier, U. S. Alexander, Sec. Treas.

The "Made in Alberta Banquet," held under the auspices of the Golden Rule W. I. on Nov. 8th, was an entire success, the good things supplied being highly appreciated by a large number of guests. E. C. MacKenzie of Lethbridge was the principal speaker and took for subject "Alberta Products," his remarks being highly interesting and enlightening on the progress made in the sunny province. Musical numbers by Miss Pharis and her brother added to the general enjoyment. The ladies of the W. I. are to be congratulated on the outstanding success achieved.

Mr. and Mrs. R. Ruggles entertained to whist on Tuesday evening. The prize winners were Mrs. Patolski and D. W. Scott, first, and Mrs. E. Ruggles and Mr. Patolski, consolation. A peanut contest was won by D. Scott and a bird contest by Joan Scott and M. Duhamel. Refreshments were served after which 500 was played until midnight.

D. G. Farmer visited Charesholm on Wednesday.

THURSDAY, Nov. 14, 1929

Business Conditions

(Canadian Bank of Commerce Letter).

Business throughout the Dominion has been for the most good, although there is a general feeling that the level of trade during the winter will hardly be as high as a year ago. On the whole manufacturing continues active and in several centres reporting that they are operating at capacity. Wholesale and retail trade has been good, but the mild weather of the last month has retarded sales of clothing in some districts. Railway loadings in Western Canada are somewhat less than a year ago, but in eastern Canada they have been uniformly heavy from the beginning of June to the end of October.

The iron and steel industry, which is yearly becoming of greater importance in this country, maintains a fairly steady output at a high level, except in those branches which are dependent upon the automobile industry. The temporary halt in the activities of the latter is almost the only unsatisfactory element in the general industrial situation.

The lumber market continues to be dull in spite of the fact that production has been on a restricted scale. The Atlantic coast market continues weak and the chief export demand is from Australia and Japan. This winter's cut of pulpwood should be heavy as the demand is active. A considerable number of men thrown out of employment through stagnation in a few centres have already been absorbed by pulpwood operators.

Strong competition from Norway, especially in the Cuban market, has been an unsatisfactory feature of the Atlantic fisheries. Siberian salmon is also competing with the British Columbia pack in Great Britain but the domestic and Australian markets may be expected to absorb most, if not all of the total pack, which is short in every class but sockeyes, with a marked shortage in pinks and chums.

Construction continues on a high level. McLean Building Reports Limited gives the total contracts awarded during October at \$57,083,600 or \$12,500,000 above the total for October, 1928. Of this over \$27,000,000 is accounted for by engineering contracts, including \$10,000,000 on account of the vast power development scheme at Beauharnois, which may be expected to swell the total contracts for the next six months. The bank estimates that on the basis of contracts awarded for work as yet uncompleted, the country has in sight construction totaling \$250,000,000 in value as against about \$210,000,000 at this time last year, an increase of approximately 20 per cent. It is gratifying to note that the value of contracts for industrial buildings, while showing a seasonal recession, is on a much higher level than a year ago and that the number of factories erected in Canada by Ameri-

can companies continues to expand, a tribute to the fundamental soundness of labour and other conditions in this country. The unusually dry autumn in central Canada and the greater part of the west has retarded fall ploughing and diminished the returns from dairy herds. It will require to be offset in a large measure by a good rainfall before the winter sets in, if soil conditions in the spring are to be satisfactory.

NOTES AND COMMENT.

From what appears to be a general misunderstanding there would appear to be pretty close to a deadlock in regard to the skating and curling rink. For the past two years with tenants acquired by the council conditions have been very unsatisfactory to the curlers. Should a third tenant turn up who has had no experience in making curling ice there will be a decided shrinkage in the number of those paying curling fees, a condition which will make it impossible for anyone to operate the two rinks. That this result would be deplored by everyone almost goes without saying and it would appear there is room for a revision of opinions. If the entire responsibility of a losing skating rink

League of Nations Society Accomplishing Good Work, But Handicapped By Lack of Funds

With the visit of Rt. Hon. Ramsey MacDonald to the United States and Canada, and the momentous decisions which will result from that visit, public attention has been concentrated on the subject of world peace.

In considering this subject much credit is given to the League of Nations, in Geneva, and the great work it is doing. This is only right and the more the ideals of the League are brought before the public, the more likely it is that still further practical results will follow its efforts. But in Canada and elsewhere it is only fair that some credit should be given to the home societies which are actively propagating League ideals in their several countries.

In Canada there has existed for some nine years an organization well and favorably known as the League of Nations Society of Canada. Handicapped by lack of funds, by comparative public indifference and an inadequate staff, it has continuously attempted to be an influence for good in all parts of the country and to zealously battle for the ideals for which it was founded.

Through the co-operation of the press of Canada, whose leading executives recognize the importance of its campaign, some publicity has been given to the yearly effort of this organization to increase its membership, but we feel that more continuous co-operation both by press and public would be most opportune at the present time.

Known to far away, and many of the issues with which it deals are too complicated for the average man to read with understanding. No organization is more in need of sufficient interpretation, and that work is being carried out with painstaking diligence. It is not too much to say that such an organization would be a fit subject for a perpetual endowment which would relieve it of the necessity of fundraising for the comparatively small sum which it requires to carry on its immensely valuable work. The Frederick Daily Mail.

Canada's New Northwest

John M. Enrie Tells Easterners Of Development in the West

Speaking at a joint dinner of the Canadian and Rotary clubs at Sherbrooke, Que. John M. Enrie, managing editor of the Edmonton Journal, described what he calls "Canada's New Northwest," and told of the active progress of that section of the Dominion, stretching northwest of Lake Superior, and basic causes of the new movement—the lure of mineral wealth as well as agriculture and forest development.

"It has to do with new discoveries of oil and gas," said Mr. Enrie, "with new trade routes and new foreign markets, and with economic changes that are making for decentralization of industry."

Had Tried It

One morning while the children were eating breakfast, Elliott put two heaping spoonfuls of sugar in his cocoa.

"I should think one spoonful would be enough," objected his sister. "I should think so, too," he replied, "but it ain't."

Anguished Diner: "Waiter, call the manager! There's a beetle in the soup!"

Waiter: "It's no use sending for him, he's scared to death of them!"

Think twice before you speak and you'll have twice as much not to regret.

Dietician says hash contains vitamins. If any other foods contain vitamins, hash just naturally has to.

"Leon, before I marry you, I must confess that I have a glass eye."
"That is nothing. Only one more window to clean."—Moustique, Charleroi.

Jap Diplomats Land

"The destinies of Canada and Japan lie together in the great Pacific Ocean," declared Hon. Tetsuichi Tokuwaga, K.C.V.O., first minister to represent the Emperor of Japan in Canada, when he reached the Dominion on board Canadian Pacific liner "Empress of France," at Vancouver, recently. With him in photographs Togo Fukuma, Japanese Consul-General. Mr. Tokuwaga is the son of Prince Iwano Tokuwaga, and a man of long experience in diplomacy. He was on his way to Ottawa to present his credentials to the Canadian Government from the Japanese Emperor.

Miracle Of Conducting

Dr. Erich Fisher, a Swiss engineer, has completed an invention whereby orchestras in different countries could be conducted simultaneously by wireless. An experiment will be made at Zurich shortly, when orchestras in London, Paris, Berlin, and Milan, under Dr. Fisher's command, will unite in transmitting a new hymn to commemorate the tenth assembly of the League of Nations.

Whales depend upon hearing more than any other sense to protect them from their enemies.

Evidence Of Ancient Customs

It was customary for girls in ancient Greece and Rome to offer, when they approached the marriageable age, their dolls to Venus or Diana. Many of these ancient dolls, made of wood, clay, ivory or wax, have been found in tombs of Greek and Roman origin. These curious votive offerings seem to have been universal in the ancient world.

If species adapt themselves to adversity, as the evolutionists say, why haven't lawn grasses learned to grow so high and then quit?

Projected Trans-Atlantic Air Service From Canada To England via Greenland

Seed Oats To Be Supplied

Farmers in Saskatchewan Dry Area Should Order Early

That arrangements were made some time ago for the purchasing of seed oats for farmers in the drought affected districts of Saskatchewan, is announced by Hon. W. C. Buckle, Minister of Agriculture, who stated that a considerable portion of the oats required for this purpose have already been bought and deliveries are being made to the Canadian Government Elevator, at Moose Jaw. R. M. Johnson, of Pasqua, acting as seed purchasing commissioner, has represented the government in these transactions, but is not purchasing today as has been reported in the press.

Investigation reveals the fact that while there is in Saskatchewan a sufficient quantity of oats to meet feed requirements, there does not appear to be sufficient seed oats, consequently purchases have been made in the province of Alberta in addition to those which have been and are being purchased in Saskatchewan.

The Department of Agriculture is receiving offers of seed oats grown in Saskatchewan and is making selections from these of quantities suitable for seed purposes. It is not expected that there will be any difficulty in securing a sufficient supply of seed oats if oats which are suitable for seed are used for that purpose instead of for food. It is also expected that prices to farmers in the affected areas will be within reasonable bounds for grades No. 1 and No. 2 seed.

The minister stated also that in his opinion it would be well for farmers to make arrangements at an early date to provide for their seed supply in order to avoid possible disappointment.

Grain Mixtures For Feed

Practice Of Sowing Mixture Of Grains For Feed Over Growing Oats Has Little Value

There is apparently little advantage in sowing mixture of grain for feed over growing oats alone when a good variety is chosen. This conclusion, at least, may be drawn from an experiment that has been going on for several years at the Fredericton, N.B. Experiment Station, and is published in the report of the superintendent for last year, which may be secured from the publications branch, Department of Agriculture, Ottawa.

Three plots were sown with mixtures and three with single varieties. The grains used were: Barley, wheat, Victory oats and Charlottetown No. 80 barley. For the past four years the average yield has been highest with Victory oats which were sown at the rate of three bushels per acre. The yield was at the rate of 1,648 pounds to the acre, as against 1,642 for a mixture of wheat one peck, oats two bushels, and barley one bushel. The next lower yield was 1,600 pounds from a mixture of wheat two pecks, oats and barley one bushel each. When wheat, oats and barley were sown in equal amounts of one bushel each to the acre the yield was 1,506 pounds. The barley alone sown at two and one-half bushels to the acre gave a yield of 1,316 pounds, while Huron wheat sown at one bushel and three pecks, yielded 708 pounds as an average for the four years.

In another series of experiments, barley and oats when sown in combination and at different rates were compared with oats and barley sown alone. The highest average yield for the four years was 1,764 pounds to the acre from a seeding of one bushel of barley and two bushels of oats. Victory oats alone gave the next yield of 1,648 pounds, it was followed by oats six pecks, and barley six pecks, and together, of 1,584, while oats one bushel and barley one bushel, gave 1,471 pounds, and barley alone, 1,316 pounds to the acre. In the second series of experiments the highest yield was obtained from a mixture of two parts of oats, one part barley sown at the rate of three bushels to the acre.

Details of the projected trans-Atlantic air service from Canada to England via Greenland, are contained in information received by the Civil Aviation Branch of the Department of National Defence at Ottawa.

The scheme, which calls for an elaborate outlay of airports and radio beacons from Winnipeg to Baker Lake, and from Baker Lake to Cape Dyer, in Canada, is advanced by Warren Scholl, a consulting engineer from Chicago, who is now staying in Winnipeg.

Mr. Scholl is seeking to promote the scheme, which calls for a daily service between Chicago and Croydon, using Winnipeg as the main stopping point on this continent. He speaks in a lecture service between New York and Winnipeg, as well as between the western city and other important population centres.

From Cape Dyer, it is planned that planes should fly to Southern Greenland where an airport would be established on the level surface of the ice cap. From Greenland planes would fly to Iceland, to the Faroe Islands, and over Ireland to Croydon.

Mr. Scholl is seeking to organize three separate companies, one in the United States, one in Canada, and one in Great Britain, which would bear the cost of the whole scheme between them.

His plan calls for the floating of separate planes in each country and for the exchange of blocks of stock between the three countries involved, should profit and loss would be equally divided.

Planes used in the service would be amphibious, of all-metal construction. Pilots would be guided along the entire route by radio beacons, which, Mr. Scholl thinks, would defeat the hazards of bad weather flying. Superstitious aviators would enable pilots to make blind landings with an accuracy of four feet, considered by authorities to be a safe margin. The route would not be lighted, although airports would be equipped with the most modern of lighting equipment.

Revenue would be derived through the carrying of passengers, mail and express. The machinery would have a capacity of not more than 20 passengers, while a system of deferred express rates, something like cable rates, would be instituted to make up pay loads on days when the passenger quota was small.

Where the Rain Goes

Experimenters Show Largest Amount Returns To Atmosphere Through Evaporation

Where does the rain go? A three-year study by the United States Geological Survey has answered this question. The Pomperaug Basin, in Connecticut, which is believed to be typical of the country at large, was given intensive study. The results, says Popular Science Monthly, showed that of the annual rainfall of 44 inches, 21 inches flow out through streams. The other 23 inches return to the atmosphere. Evaporation from the soil, from water surfaces, and from the leaves of trees account for these tons of moisture that enter the air.

Spilled the Show

The Dramatic Society was presenting an historical play, and one of the newly enrolled members had been assigned a part with exactly one line to speak. He was the headman, and arrayed in all the glory of black livery and mask, he strode on to the centre of the stage and announced: "My lord, my lord, I have beheaded the maid."

"Oh, you have, 'ave you?" retorted another small-part man in the guise of the first clerk. "Well, show me to tell you that you've messed up the line blooming show. You've been and done it two acts too soon."

One thing we haven't seen yet is a paper gaud towel.

"What luck! We are falling right in with the 'Rain' production figures of that province."

—Buen Humor, Madrid.

The Singing Fool

By HUBERT DALL
Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrell, the cigarette girl, but he does not know that. He marries Molly Winton, a buxom singer, and with fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend, taking the child. Molly consents to a last farewell between Al and Junior before she sails for France. After three weeks at a park entrance Al walks towards the center of the city, completely broken by his tragic loss. He plans to leave the Broadway night life and disappear. The lights of evening flick the sky.

CHAPTER XXI

But, in order to live, Al knew he must create a new life for himself. The old life was closed. He felt himself entirely alien to night clubs and the whole Broadway life; if he wrote a song it would be so tragic and filled with pain that no song-publisher or revue producer would want it. He was there was nothing for him to do but disappear from the old haunts.

In a few days, when he had pulled himself together, he would see Cline and collect on his share of the ownership of the Club Bombo. Then—goodbye!

He had reached the end of the park, at 50th Street. How the city roared; the night life was beginning. The life of which he had been a living part only a short time ago. He glanced at his watch—almost six o'clock. They were ordering all the visitors ashore from the Ile de France; in a few moments the gangplank would be lifted and the big floating hotel of a liner would pull slowly from the dock.

Days passed; and Broadway saw no more of Al Stone. Where had he gone? His friends asked. Grace, his former business partner, but Billy could only shake his head sadly and say he didn't know. Marcus wanted Al to write new numbers for a revue he had in rehearsal, but there was no Al to be found.

"What do you think's become of him?" asked Marcus of another songwriter. "The river?" suggested the composer.

"No," Marcus shook his head vigorously. "I don't think Al will die any time. He loved his boy too much. He'll live for that boy—you'll see. He may slip terribly, but—hope for the boy will keep him going somewhere, somehow. We can't tell—he may be perfectly all right; he may have gone on a world cruise to the west, or the man who had been the westerner country for a while.

So the conjectures passed from mouth to mouth, up and down the White Way. But Al was still in New York, living in a cheap hotel, wearing shabby clothes, his money in the bank, forgotten. He was a shadow of his former self. He walked the streets by day and night, occasionally turning in to sleep. But always he stayed away from the fashionable streets and the Broadway section. He developed a terrible dread that he might meet some of his friends and he kept a constant, furtive lookout for familiar figures. If he saw one he quickly crossed the street, turned the corner and disappeared.

He was still searching desperately for a plan whereby he could rebuild his life on some new basis. But that could not be done, because he was definitely of the night club life. If he had become a singing waiter while still in his teens—the cabaret life was the only one he understood. He could only wander—through the Ghettos, along the waterfront, through Little Italy. He made friends with old characters—fish peddlers, park bum, old Irish cabaret. But always he was drifting downward.

Then came the day when he happened to glance across the street and saw a face he knew. Surely that was Grace, who used to be a cigarette girl at Blackie Joe's place near the Village. As she stared intently at him Al dodged rapidly round the nearest corner.

Grace's eyes followed Al in astonishment as he hurried around the corner and disappeared. At her first glimpse of him she had not been sure of his identity; it was a year since she had seen him and during that time he had almost become a different person in appearance. His little, self-confident walk was gone, his

clothes were old and nondescript, his face was thinner, and his eyes hardly glowed in his eyes had vanished. Nevertheless the man who stared at her in sudden recognition for a moment was Al—she was sure of it. She walked back to the corner and followed the direction he had taken. But either Al moved faster than she or he had started up an alley, for she saw no sign of him. Thoughtfully she retraced her steps, her mood and expression sobered by the tragic implications of the sight she had just witnessed. So that was Al, breezy, wide-grinned, generous Al—the man who had been the hero of her girlhood three years ago, the man she had loved so devotedly! That was the youthful singing waiter whose rapid rise to fame had been one of the romances of Broadway and whose disappearance into obscurity had been one of the mysteries of the Street of Lights.

Grace had followed Al's career with the keenest attention from the fateful time when he left Blackie Joe's night club until recently. She knew every story of his triumphs, every version of his disastrous marriage, as they were gossiped about in cabaret circles, uptown and downtown, and in the columns of newspapers and theatrical weeklies. For a year after Al left Blackie's her love for him had remained, rising to a throbbing pain within her, then a faint murmur from the past.

But after he ceased to visit Blackie's and became a part of her life, following to Broadway, this spirit of love became like the last note of an echo—it seemed to pass away lightly, before that man had been able to do so. Grace had just a graceful and vague figure who had acted strange and she had not been able to do so.

Grace had stayed on at Blackie's club, but she had no sentimental talent to carry her to the heights of a great success; she could not sing and dance professionally. She possessed a lovely and beautiful face, a strong loyalty, keen intuition, plain common-sense and a frank, unpolished nature. These qualities, while they may be among the most important in life, may not win fame for the persons who possess them.

Grace was obscure, but still she had scored her little successes. After Al was swallowed up by Broadway, Blackie Joe, himself, had kept a kindly eye on her and saw she was protected from the riff-raff among his customers. Soon he had promoted her from the job of waitress to girl and raised her salary. Now she was his assistant manager; she kept track of his income and checked the terms when they came and food and drink to the customers.

Blackie had felt terribly sorry for Grace after Al went off. Mollie—she was the only living person, with the exception of Grace, herself, who had any conception of the deep love the former cigarette girl had for Al. Blackie often asked himself—Why on earth would Al desert the woman who loved him? Mollie's desertion he nodded sadly.

Now, as Grace pursued her way, a flood of memories swept across her mind—Al as he used to look in his water clothes, Al as he had sung his first love ballad—"Always"—to Mollie on the floor of Blackie's club. Al as she had once seen him at an uptown night club, resplendent in his clothes. Al as she had seen his picture in the papers with Mollie and his baby, Junior.

Grace still recalled how the news of Junior's arrival had sent a stabbing throbbing through her heart that she did not understand. Then came an intense longing to see the baby that Al fathered, but that too was a faint memory—now.

It was afternoon and Grace was not due at Blackie's until evening. However, she wanted to tell the night club owner her news, so she changed her course and mounted the familiar, shabby steps. The main room was dark and deserted, but Blackie was in his office. He glanced up as Grace entered.

(To Be Continued.)

Centres Of Lumbering

The Ottawa Valley became the most important centre of commercial activity in the lumber industry of Canada with the beginning of the trade in rafting its square timber to Quebec for export. The Georgian Bay and Rainy River districts were later opened up and although the industry is now established over the entire Dominion, these districts are still among the most important lumbering regions in Eastern Canada.

Australia, New Zealand and Argentina are the greatest wool-producing centres.

Two many characters are left around here.

Wins Aquiluh Cup

Miss Pearl Miller, a New Canadian in the Awarded Coveted Trophy. Miss Pearl Miller, 10, a new Canadian, is this year's winner of the silver challenge cup presented to the pupils of Aquiluh school by the late Earl of Oxford and Aquiluh. The trophy is awarded annually to the most proficient pupil.

Miss Miller, now attending Saskatoon Normal School, came to Canada from Russia in 1924, and was then unable to speak English. From August, 1925, to June, 1926, she attended public school in Saskatoon, and in 1926 she moved to Aquiluh and took her high school work in the next three years.

BABY'S OWN TABLETS WIN GREAT PRAISE

Many Mothers Always Keep Them In The House

Thousands of mothers state that they know of no other medicine for their babies. Baby's Own Tablets are in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they carry them to the heights of a great success; she could not sing and dance professionally.

Concerning the use of the Tablets Mrs. Daniel Phidore, Tragway, Que., writes: "I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones, and I am glad to state that the Tablets have always kept them in perfect health. I feel safe with the Tablets that I always keep a box in the house."

Grace was obscure, but still she had scored her little successes. After Al was swallowed up by Broadway, Blackie Joe, himself, had kept a kindly eye on her and saw she was protected from the riff-raff among his customers. Soon he had promoted her from the job of waitress to girl and raised her salary. Now she was his assistant manager; she kept track of his income and checked the terms when they came and food and drink to the customers.

True Friendship Is Rare

But Few People Make Any Effort To Retain It

We should never let a friend go out of our lives, if we can by any possibility help it. If a friend is standing aright, let them be quickly set aright. Friendship is a too rare and sacred treasure to be thrown away lightly. And yet many people are not careful to retain friends. Some lose them through inattention, failing to maintain those little attentions, courtesies, kindnesses which cost so little and yet are hooks of steel to grapple and hold our friends.

Death by killing was a favorite method of execution in the time of Henry VIII.

John Bull A Poor Advertiser

Discovered That Great German Flying Boat Fitted With Engines Of British Design

When the great German flying boat sailed over Lake Constance the other day with the record human load of 169 persons, the world of aviation properly hailed it for what it appeared to be—a new triumph in the air for Germany. But all the story was not told at once. Germany may not claim a triumph. The great craft was fitted with twelve engines, 123 horsepower each, of the British Jupiter design, made in German workshops under British license.

Little, if anything, appears to have been said about these engines until an aviation critic in Great Britain came out with the warning that the light in question "throws Britain further behind in civil aviation and makes Germany the leader of commercial flight throughout Europe."

Then the truth was told. As one Canadian correspondent in London says: "The curious British mentality which finds Britain backward in thousands of ways and foreign countries more advanced has received a rude shock from the discovery about these engines." Once again John Bull has shown himself to be a poor advertiser—Victoria Daily Times.

Send Mail By Rockets

Claimed That In Short Time Mail Will Be Carried By Rocket From Berlin To New York

It is confidently expected by the German Professor Oberth, that in a short time mail will be sent by rocket from Berlin to New York by a single propulsion. This means that letters thus sent will arrive in New York about a half hour later. The German has shown himself to be an American ambassador to Germany was prompted to say: "I must call attention to the fact that our government will be required, but if Professor Oberth asks permission to shoot a rocket to America the state department must be informed."

As the American ambassador, Mr. Schuman, is a man of broad intelligence, it may be assumed that his acceptance of the possibility of such a feat is not ridiculous. Rockets are, seemingly, the newest toys and instruments of a scientific age which prefers to leave nothing to the imagination. Rocketeers will soon be joining racketeers to disturb our peace and to turn the incredible into the commonplace.

Your Child's Cough

Needs this Double Dose of Vicks VapoRub. CHILDREN have to be "dosed." When rubbed on, Vicks relieves colds 2 ways at once without "dosing." (1) Its healing vapors, released by the body heat, are inhaled, direct to the air passages; (2) "It draws out" the soreness like an old-fashioned poultice.

Oh, this is blessing, this is rest! Into thine nostrils O Lord I flee; I little me in Thy faithful breast. And pour out all my soul to Thee. O Lord, I am altogether thine. Have mercy on me, O Lord, for I am sick. Peace is mine in trusting Thee! Anna Laetitia Waring.

Little Helps For This Week

"Thou will keep him in perfect peace, whose mind is stayed on Thee; because he trusteth in thee."—Isaiah xvi. 3.

Oh, this is blessing, this is rest! Into thine nostrils O Lord I flee; I little me in Thy faithful breast. And pour out all my soul to Thee. O Lord, I am altogether thine. Have mercy on me, O Lord, for I am sick. Peace is mine in trusting Thee! Anna Laetitia Waring.

Place your whole trust in the Lord. Let Him alone be your father and your love. He Himself will answer for you, and will do what is best for you. Here you have no one to depend on, and wherever you are you are a stranger and a pilgrim; nor will you ever find a real home. You are united to Christ.—Thomas A. Kempis.

Determined To Come To Canada The Scottish editor of the London Express says: "A young Scotsman, who booked her passage to Canada at Wood Green, paid her fare of 11s. in half-crown, having saved one half-crown for three years."

Persian Balm creates and preserves lovely and youthful complexions. Tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Swiftly absorbed by the tissues, making the skin wonderfully soft-textured. Unrivalled as an aid to feminine elegance. Delightful to impart additional charm to the complexion of women. Persian Balm, the one toilet requisite for the exacting woman. Peerless as a beautifier.

Critic: "The picture of the horse is good, but what's the wagon?" Artist: "Oh, the horse will draw that."

A Chinese professor claims to have found a man, Li Yung, who is 202 years old. What a Li. Professor!

Planes arriving at or departing from the Chicago district have 29 landing fields from which to choose.

CONSTIPATION RELIEVED QUICKLY

CARTER'S Little Pearls Vegetable Pills. This Purely Vegetable Pill will move the bowels without any pain and without any depressing after-effects. Sick Headaches, Indigestion, Biliousness and Bad Complexion quickly relieved. Children and Adults can easily swallow Dr. Carter's tiny, sugar coated pills. They are free from calomel and poisonous drugs. All Druggists 25c and 75c red pills. CARTER'S LITTLE PILLS

The Scotch are much good golfers because they realize the fewer times they hit the ball the longer it will last.

Needless Pain!

The man who wouldn't drive his motorcar half a mile when it's out of gear, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves. It's unwise, and it's unnecessary. For a tablet or two of Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions, and you'll discover many valuable uses for these tablets. For headaches to check colds. To ease a sore throat and reduce the infection. For relieving neuralgia, neuritis, rheumatic pain.

People used to wonder if Aspirin might be harmful. The doctors answered that question years ago.

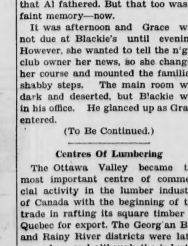

Aspirin

TRADE MARK REG.

It is not. Some folks still wonder if it really does relieve pain. That's settled. For millions of men and women have found it does. To ease the cause of any pain you may suffer from Aspirin for immediate relief.

ASK SUSPENSION OF MONEY GRANTS FOR MILITIA

Winnipeg.—Demand for cessation of all money grants by the Dominion provincial and municipal governments for military purposes was contained in a resolution passed by the all-Canadian Congress of Labor in annual convention here.

Abolition of the entire cadet movement from Canadian schools was also demanded in the resolution, which urged that no further money grants be made for cadets.

Heated opposition by a number of delegates to the clause demanding that no money grants be made for military purposes by the various governments kept the issue before the assembly for the greater part of the afternoon and only by a small margin was the resolution passed.

Alleged discrimination by certain United States industries operating in Canada was brought out in debate on a report of the executive board reviewing labor conditions in Canada. Feeling against the International Labor Union was manifested by several speakers. The American Federation of Labor, which has been allied to have demanded that no other unions but those belonging to the international union be given employment.

It was charged in the executive board's report that the craft unions controlled by the American Federation of Labor, were responsible for the "impotence of the workers, politically and economically, in their own country, and responsibility in regard to which labor had been held in Canada."

The congress decided to request the Ontario government that boarding schools be constructed at intervals of not more than 120 miles in the territory west of the Great Lakes to the Manitoba boundary.

German Air Liner Wrecked

Six Persons Were Killed and Two Injured In Crash

Marden Park, Surrey, England.—Six persons were killed and two injured in the crash of a big German air liner bound for Berlin from Cologne. Three of those killed were passengers and three were crew members.

One of the survivors was Prince Eugene Schuamburg-Lippe, second cousin of a former reigning prince of one of the oldest German royal houses. He was acting as second pilot. The prince was injured but is expected to recover. The other injured man, Lieutenant-Commander Glen Kidston, widely known racing motorist, suffered cuts.

The crash which was followed by the machine bursting into flames, is believed to have been caused by the pilot flying into a hillside during a fog.

Behind the remnants of the air liner was a large tree which had been torn from the ground by the big machine's last lunge. The crash and the burst of flames followed instantly, and after the first seconds, there remained only the charred wreckage in which the victims had been trapped.

Coming To Canada

Thousands Of Mennonites Would Leave Russia For This Dominion

Moscow.—Three thousand Siberian Mennonites, mostly from the Ukraine, have received passports to migrate to Canada. Before granting the passports the Soviet authorities exacted full payment of taxes and specified that the emigrants deposit all their possessions in Russia, since exportation of rubles is forbidden.

Seven thousand of the would-be emigrants are concentrated in camps around Moscow obtaining passports at the rate of 100 per day.

Walker Again Mayor Of N.Y. New York.—Mayor James Walker, more familiarly known as "Jimmy" to the millions of the metropolis, was swept into office again for another year on the crest of a Democratic tidal wave of great proportions. He defeated Congressman Fiorello H. LaGuardia, candidate of the Republicans and Fusionists, by a plurality of 47,165.

Princess Will Resume Tour

London, Eng.—King George and Queen Mary have officially approved the Prince of Wales' intention to resume his tour of Africa, interrupted last December when the fleet left for the Mediterranean. It is expected the Prince will call at Capetown on the steamer "Kenilworth Castle," January 31.

Dog Rescues Wounded Trapper

Carried Note To Nearest Camp and Returned With Help

Nakina, Ont.—Once again a man owes his life to the intelligence and faithfulness of a dog. Andrew Syvitski, 22, accidentally shot himself when he drew a revolver from his holster while hunting at an isolated camp at Pine Lake.

Realizing his predicament and knowing that he could not reach the nearest trapper's cabin himself, Syvitski scribbled a note and fastening it to his dog's collar, ordered the animal to proceed to the nearest camp, owned by Thomas Hughes.

The dog ran through three miles of bush and swam a river to reach Hughes' cabin.

Hughes, with the animal leading the way, reached Syvitski's camp and after rendering first aid, brought the man to the nearest camp. A railway speeder brought the wounded man to Nakina, and he was later rushed to Port Arthur by train.

Aviators Killed In Montreal

Seaplane Of Canadian Government Crashed While Being Tested

Montreal.—Pilot Officer Paul Carson Stanley, 28, of Toronto, and flying officer John L. McLaughlin, 35, of Montreal, were almost instantly killed when a Canadian Vickers "Velocipede" which they were testing for the Canadian government crashed in a field near Sault aux Recluses. The plane buried its nose in the soft surface of the field and by the time the two airmen were released they were dead, crushed in the wreckage.

McLaughlin was a test inspector and Stanley was flying the seaplane. They had made a previous test flight early in the week, but the weather conditions were not suitable for flying and a second flight was attempted in the afternoon. It was believed that the machine had gone into a spin at a time when, owing to the low "ceiling" the pilot was unable to recover before reaching the ground.

Predicts Era Of Disease

New York Physician Says Slim Conditions In Europe Unbelievable

New York.—Senator Royal S. Copeland, of New York, on his return from a twelve weeks' visit to Europe, said he never saw such squalid poverty as in the slums of European cities. He said conditions in the poorer sections were almost unbelievable and predicted they would result in an era of disease. "This country," he said, "must guard itself against that by strict immigration regulations. The examination of aliens must be more thorough and there must be more men to do it."

Sensor Copeland is a physician and a former commissioner of health in New York City.

PROBLEMS AWAIT NAVAL PARLEY IN JANUARY

Washington.—In the swing of time toward January and the five-power disarmament conference in London, the government here and officials of the states and navy departures for the hard at work upon the case of the United States. While in the main Great Britain and the United States are agreed upon what should be done, it is necessary for each to maintain in the much-discussed cruiser class, it has been emphasized here again and again that no satisfactory agreement may be arrived at without the assent of all the powers concerned, and this opens a wide field for research containing both technical and political elements.

Secretary of State Henry L. Stimson has been for some time continuously in touch with the general board of the navy and the Under-Secretary of State Joseph P. Cotton, have also consulted frequently with President Hoover.

Ambassador Charles G. Dawes, a fourth member of the delegation, is expected to stay for some time at the White House. During his present visit here from London, an opportunity will be afforded them to complete canvassing of the whole place. President Hoover places large hope upon the London conference.

The chief problem as the situation is viewed from Washington, concerns the powers of France and Italy and Great Britain and geographically as situated in the Mediterranean.

First, France and Italy must arrive at an agreement upon parity, which they may do between themselves. But both France and Italy are opposed to the abolition of the submarine, favored by both Great Britain and the United States.

"The poor man's battleship" has an interesting significance in the Mediterranean wherein is one of the great trade routes of the British Empire.

Another matter which receives attention here is the proposal of France that London should be validated at the Geneva—suggestion, which finds no favor in the United States.

Japan, it is indicated, would like to have her cruiser strength proportionately to the British and the United States, making her seven to ten instead of as present.

How do you like our Lack-A-Line Limerick? Good? All right, here's another:
There was a young fellow named Wier,
To touch a live wire—
Who laid'st an atom of fear,
He indulged a desire
To touch a live wire—
? ? ? ? ?

We unloaded a car load of tractors and plows this week.

Take a hollow rubber ball, cut it in two with the scissors, make a hole in the middle of whichever half you wish to use, just large enough for your paint brush handle to go through, then put the half ball up tightly on the handle of the paint brush, cup fashion. This will keep the paint from running down the handle of the paint brush.

"Good Equipment Makes a Good Farmer Better."

brush and getting onto your hands when painting ceilings.

Mr. and Mrs. R. I. Baker were the guests of Mr. and Mrs. G. L. Stubbs of Calgary during the holidays.

Miss Ina Hammon left for Vancouver on Tuesday where she has a position with the Brewster Co.

Champion theatre is planning an extra good program this Saturday night for the many patrons of the annual United Church Bazaar. Show at 8.30.

Mrs. J. T. Stephenson spent a day in Calgary visiting at the Bell home before they left for California.

Mrs. C. Williamson visited her sister in Calgary during the week.

K. R. McLean, R.O. of Anderson & McLean, Sight Specialists 208 8th Ave. West, Calgary, will make his monthly visit to Champion Friday, November 22 at the Drug Store.

Wealthy apples, finest cookers of all. These are not wrapped, size 165. Extra special to clear, \$1.05 box—Campbells.

Lebsack—Giriltz

The marriage of Sam Lebsack of Champion, and Miss Alma Giriltz, of Calgary, took place in the Moravian church, Calgary, on Saturday, October 26. The bride, who was given away by her father, was attended by her sister, while Ben Lebsack supported the groom. The bride was dressed charmingly and carried a bouquet of American beauty roses. There were over 200 wedding guests.

Following is a corrected list of prizes won by B. H. A. McDonald at the Calgary Fall Show:

Pen of three rams, any age, bred by exhibitor in Alberta, 1st.
Pen of three ewes, any age, bred by exhibitor in Alberta, 1st.
Shearling rams, 2nd and third.
Ram lambs, 1929, 2nd, 3rd and 4th.
Oxford ewes, any age, 1st and 2nd.
Ewe lambs, 1st and 2nd.
Champion and reserve Champion ewes any age.

Also the champion and reserve champion ram was bred by Mr. McDonald.

In the sale 11 yearlings rams averaged \$60, and ten ram lambs \$40 each.

It's a scream! She thought he was a chauffeur. He thought she was a shop girl. Both were wrong, but until they found it out they went through the most amusing series of embarrassing complications in a department store, in a rich man's home—and in jail—that you ever saw, if you have to laugh—don't miss this one! "Home Jones," next week's issue.

Winter Milk Production

(Experimental Farm Note.)

While a good milking strain is the primary factor in winter milk production, suitable feeds and feeding methods are almost as important. In fact, the greatest results cannot be attained from the dairy herd unless the good breeding is backed up by good feeding. Also, unless a liberal supply of good roughage and a suitable grain mixture is provided, it is useless to expect winter dairying to prove profitable.

Dairymen have long appreciated the value for milk of the succulent pasture grasses which are so abundant in the spring and early summer. To obtain succulence in the winter, or when pasture is not available, crops are made into silage. Silage is one of pastures' best substitutes.

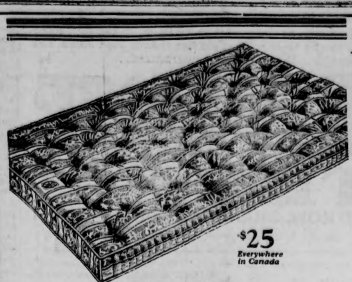

Roots, such as mangels or turnips are also of value as a feed for dairy cattle during the winter months as they are very palatable and add considerable succulence to the ration. A few roots fed with the silage improve a ration considerably.

To obtain best results from the dairy cows in winter a liberal supply of legume roughage should be fed in combination with a succulent feed such as silage or roots. Legume hays are high in crude protein and lime and are therefore of great importance in reducing the amount of expensive protein-rich concentrates needed to provide a properly balanced ration for the dairy cow. When an abundance of alfalfa or sweet clover hay of good quality and silage from oats, corn or sunflowers is supplied, it is not necessary to purchase such feeds as bran and oil cake for ordinary producing cows. The addition of a small quantity of a concentrate rich in protein, like bran or oil cake meal, makes a ration adapted to healthy producers of milk. By feeding good legume hay the dairyman is able to reduce his meal ration considerably. Legume hay, silage and a small quantity of ground oats make a good dairy ration.

At the Dominion Experimental Station, Lacombe, the roughage fed to the dairy cattle during the winter months consists for the most part of oat, corn and sunflower silages, alfalfa and sweet clover hay and oat green feed. Occasionally, roots and western rye grass hay are supplemented to give a little more variety to the ration. Salt is fed regularly and fresh water is available in bowls at all times. An average of 15 pounds of hay, 45 pounds of ensilage and 10 pounds of roots, when available, are fed each cow per day and she is given one pound of meal for each 31 pounds of milk produced. The meal mixture fed the heavy producing record of performance cows consists of 400 pounds oat chop, 200 pounds bran and 150 pounds oil cake meal.

The best results cannot be obtained without paying heed to the fact that kindness and comfort are matters of importance in the dairy barn. The cow which is nervous and discontented does not make the best responses to feed and care. While in the barn the cow should have her stall as comfortable as is possible to make it. Keep plenty of good clean straw under her.

Sunlight and fresh air play an important part. Well ventilated stables that provide pure, fresh air and that are comfortably warm are equally important to insure dairy profits as are feed and care.

Aching Feet

The newest scientific methods of obtaining immediate and lasting relief will be explained

By Dr. Scholl's Foot Expert

Thursday, Nov. 28

IF you have a painful, stubborn foot ailment of any kind—corns, callouses, bunions, crooked or overlapping toes, weak or broken down arches, weak or swollen ankles, tender legs, excessive perspiration, hot or odoriferous feet—you can now get quick and lasting relief.

Through Dr. Scholl's newest scientific and advanced methods of correction, any foot trouble is now immediately relieved and the cause removed. To demonstrate this fact a Foot Comfort Expert of Dr. Wm. M. Scholl's personal staff will be in attendance at our store on the above date.

Without removing your stocking, this Expert will make a scientific analysis of your feet on Dr. Scholl's Foot-Graph and show you what your trouble is and what caused it. He will then demonstrate how simple and easy it is for you to have real relief. No charge is made for this valuable service.

CORN
Dr. Scholl's Foot-Graph gives instant relief, fully, fully, fully, fully, fully.

CROOKED TOES
